

TruLink[®] HDMI[®] over COAX Receiver

Transmit HDMI 1080p audio and video over one coax cable!

Simplify your demanding digital signage or residential HDMI installation with the new TruLink HDMI over COAX extender solution. This industry first high-resolution 1080p HDTV signal solution supports up to a max distance of 390ft (120m) over RG6 coax cable. The installer has the ability to customize any length. The system will auto adjust feedback, equalization and amplification, no matter how long the cable run is. Compared to other Cat5 solutions that have a distance limitation of 40m and require the use of two Cat5 cables, the HDMI over coax provides three times the distance using a single RG6 coax cable.

Receiver connects to existing transmitter or receiver to allow RG6 coax output connection to additional units, connecting up to 24 monitors.

Features:

- Supports 720p 50/60Hz, 1080i 50/60Hz, 1080p 50/60Hz (4:2:2) and 1080p 24/30Hz video resolutions
- Daisy chain up to 24 monitors (Requires extra receivers)
- Slimline remote control
- No software required
- Free technical support and 3yr warranty
