QUIKTRON
CONNECTIONS OF QUALITY

We Provide Complete SOLUTIONS

OVERVIEW

One Source – Complete Healthcare Solutions

Architects and Healthcare Facility Planners across North America are designing technology-rich spaces that cater to patients. State-of-the-art technology has made the model of shuttling the patient around the hospital extinct. Healthcare providers are now able to accommodate multiple levels of care in the patient's own environment - the patient's room.

Quiktron takes a holistic approach to meeting the demanding requirements of the healthcare market.

We Offer

- Solutions to match any budget, time frame, or lead time
- Future upgrade capabilities
- Classic design for smaller projects
- Premium design that reduces installation time and cost (save time to save money)

Add More

FLEXIBILITY

WIRELESS SOLUTIONS

Add Flexibility to Any Environment

Healthcare spaces demand flexibility. Medical professionals need the ability to print, scan, back up files and more, without being tied down to a computer or peripheral. The TruLink® line of wireless USB products provides a secured connection between your computer and the hub, allowing you to connect USB devices and access them wirelessly up to 30ft away. Common applications include:

- Conference Rooms, Board Rooms and Training Rooms
- Surgical Theaters, Nurses' Stations, Patient Waiting Areas and Digital Signage

TRULINK® SPLITTERS, EXTENDERS and SWITCHES

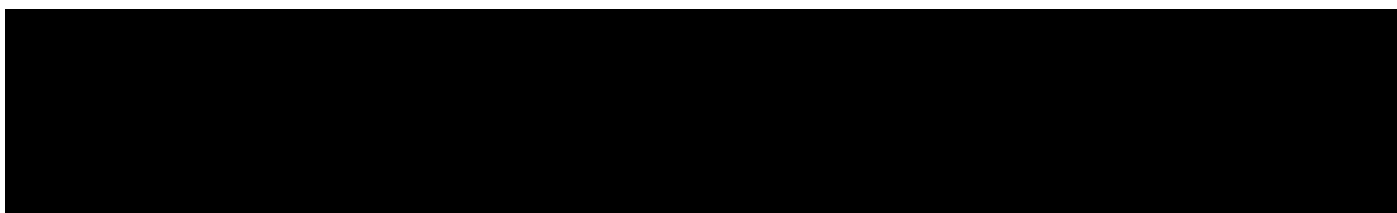

Innovative Connectivity Solutions

Display images from one PC to multiple monitors up to 210' using a monitor splitter extender. View content signals from multiple computers (up to four) on up to four separate monitors, with and without audio, using a UXGA switch.

USB SUPERBOOSTERS

Break the Limitations of USB

Quiktron offers a line of USB SuperBoosters that provide a very simple and clean solution for any healthcare need. These SuperBoosters extend the distance of a USB device to a host computer up to 150ft so that the projector, interactive whiteboard, camera, printer, or any other USB device can be placed exactly where they are needed.

Fast and Easy UPGRADES

RAPIDRUN®

The Complete A/V Connectivity Solution

Healthcare facilities everywhere are designing spaces equipped with state-of-the-art technology that adapts to a wide variety of patient's needs. This efficient design provides a complete A/V Connectivity Solution that meets the needs of today, while preparing for the ever changing patient facilities of the future. RapidRun can help!

The Benefits of RapidRun in Healthcare

- Saves time and money – facilitates faster installations and lossless signal transfer
- Designed to evolve – solution supports VGA, DVI-D, HDMI®, DisplayPort™ and Audio / Video
- Multiple signals over a single cable
- Reduces failure points by reducing the number of connection points needed
- Glides through small holes and 3/4" conduit up to a 90 degree sweep
- Built to precise tolerances resulting in the highest image resolution possible
- Designed to withstand harsh chemicals and high temperatures commonly used in sanitization
- No more field termination – reduces job site errors

Applications Include:

- IT Infrastructure
- Doctor and Dental Offices
- Nurses' Stations
- Surgery Scheduling and Patient Management
- Electronic Medical Record Displays
- Digital Signage
- Conference Room and Board Room A/V Systems
- Surgical Theaters (Patient Triage and Operating Rooms)
- Entertainment Systems (Patient Rooms, Waiting Rooms and Lobbies)

Setting the **STANDARD**

CLASSIC SERIES™

Standard A/V Connectivity Solution

Quiktron realizes that some A/V needs require a simple, cost effective option. To this end, Quiktron has introduced the Classic Series of A/V wall plates and plenum rated cables. The Classic Series sets the standard in traditional A/V cabling. Available off the shelf with industry leading lead times, our Classic Series of healthcare solutions is designed to provide uncompromised signal integrity.

The wall plates are constructed of durable, air-craft grade brushed aluminum and feature feed-through connectors in various combinations designed specifically for the needs and requirements of the healthcare market. Plenum rated cables are available in multiple formats and lengths, featuring compact connectors that save space in wall boxes.

Since 1992, Quiktron has provided quality cable connectivity solutions to datacomm and telecommunication industries throughout North America. Known to many for RapidRun®, the award-winning, complete audio/video system designed to save time and money, while evolving with changing technology. We work exclusively through the industry's leading distributors to provide custom manufacturing of fiber optic and copper cable assemblies, as well as distribution of more than 3,000 standard items.

WHAT YOU WANT, WHEN YOU WANT IT – SIMPLE

- Facilities in four convenient locations ensures you get product ... FAST
- RCDD Certified staff committed to bringing you the most personal, knowledgeable and timely service in the industry for ALL your product and installation needs
- Building and delivering unique solutions for high-quality cable connectivity needs
- Stocked with a wide range of products ranging from simple to complex, standard to custom
- Hours of operation: 7am – 6pm (CST), Monday – Thursday; Fridays until 5pm
