

TruLink™ 4-Port VGA/USB 2.0 KVM Switch with Audio

Control four computers with one USB keyboard and mouse, one VGA monitor, and speakers/microphone

The TruLink 4-Port VGA/USB 2.0 KVM with Audio offers a quick and easy way to eliminate clutter from your desktop. This switch allows you to control four computers with just one keyboard, mouse, VGA monitor and speaker set. Connect the switch to your computers via USB and VGA using the included cables. The added audio feature lets you enjoy the audio from each of the connected computers as well. You can even listen to audio from one computer while you work on files from another!

The two downstream USB 2.0 ports can be used to share USB peripherals. Two types of switching (push button and hot keys) enable you to operate the switch in the most effective way for your application.

The sleek design will save space on your desktop, and the durable metal housing features rubberized ends to protect the unit from damage. The TruLink 4-Port VGA/USB 2.0 KVM with Audio can handle even the most power-hungry devices with support from the external power adapter. Best of all, it comes with all the cables you need. There is nothing extra to buy!
