## 15-75 ft CMG-Rated Component Video Cable With Low Profile Connectors

**Provides easier in-wall installation where CMG rating is required**

Video installations in educational and commercial settings often require in-wall rated cable. Our CMG-rated line was specifically engineered to meet this requirement while overcoming common challenges faced by installers in these environments. Low-Profile connectors (1.41in total depth) save valuable space in the gang box.

This cable is constructed from three 75 Ohm coaxial cables using 26 AWG center conductors and features a tinned copper braid that provides 92% coverage over a foil shield. This design protects the cable from any EMI/RFI interference and ensures that the highest quality signal is transferred for optimal video performance.

### Features:

- Provides easier in-wall installation where CMG rating is required
- CMG-rated cables meet many NEC requirements for Communications Cables General Purpose In Wall Use
- Cables meet the following ratings: CMG, FT4, CM, CL3, CL2, CMX, CL3X, and CL2X
