

**FOR IMMEDIATE RELEASE**

**Audio/Video Online Training Available from Quiktron**

*Courses for A/V professionals provide BICSI credits*

**DAYTON, OHIO – Sept. 9, 2010 –Quiktron** (<http://www.quiktron.com>), today announced it is offering Web-based training for audio/video technologies. The training helps keep A/V professionals up-to-speed on current trends and technologies and provides them with continuing education credits from BICSI.

Each one-hour webinar course provides best practice information that can be used during an installation or when preparing, planning and specifying a new project. Successful completion of each class provides the participant with one BICSI-CEC (continuing education credit). It helps current specialists remain up-to-date on technology and provides integrators working with A/V applications continuing education credits. The courses are also open to those individuals interested in learning more about A/V integration.

“BICSI’s credentialing programs are globally recognized, and the most coveted and premiere designations in the information technology systems (ITS) industry,” said John D. Clark, Jr., CAE, BICSI executive director & chief executive officer. “We commend Quiktron on providing training and additional CEC opportunities to the professionals in our industry, in turn promoting global ITS professional development and education.”

The courses provided by Quiktron leverage its nearly 20-year history in the industry to offer professional training at a fraction of the price of other training courses and with all the flexibility associated with web-based training.

The one-hour webinars provide integrators with affordable, flexible options for continuing education. The courses are highly discounted and allow the participant to take courses according to their own schedule without incurring travel costs or requiring extended time away from work. Quiktron will continually add new courses to the curriculum.
