

# Healthcare

## **Timesaving, flexible RapidRun:**

Keeping up with technology doesn't have to come at a premium expense. Healthcare is more competitive than ever – so it's crucial for healthcare providers to stay current with technology to better service their patients.

Whether you're installing video monitors to a hospital bed or a dental chair, or setting up a video presentation system to inform your patients, RapidRun makes the process easy and less costly by:

- **Eliminating the need for terminating cables on the premises**
- **Allowing you to install at more locations per visit**
- **Drastically reducing the need for return calls caused by cable termination problems**
